

JEEVANANTHAM SANKARAN

Pudukkottai, Tamil Nadu, India

+91 8838813020 — jeevaofficial1407@gmail.com — Portfolio — LinkedIn

Professional Summary

XR Researcher and Developer with experience in Virtual Reality (VR), Digital Twins, simulation development, and technology-enhanced education. Proven track record supporting academic research projects at IIT Bombay and the University of Tennessee while developing immersive applications using Unreal Engine 5. Experienced in conducting technical workshops, mentoring students, and collaborating with multidisciplinary teams.

Technical Skills

XR & Simulation: Virtual Reality (VR), Extended Reality (XR), OpenXR, Digital Twins, Human-Computer Interaction

Development: Unreal Engine 5, Blueprints, Sequencer, Optimization & Profiling, UI Development

Programming & Data: Python, OpenCV, C, C++, Data Analysis, Machine Learning, Deep Learning

Tools: Git, Perforce, Blender, Power BI, Azure AI Document Intelligence, AutoCAD, Creo Parametric

Professional Experience

Unreal Engine Developer (Freelance) — Aura Developer Apr 2026 – Jul 2026

- Developed a high-fidelity Architectural Virtual Reality (VR) visualization experience using Unreal Engine 5 for residential and commercial projects.
- Optimized scenes for smooth VR performance while maintaining high visual fidelity across interactive walkthroughs.
- Integrated architectural CAD models into Unreal Engine and developed immersive client walkthrough experiences.

XR Developer (Freelance) — Industrial VR Safety Simulation Dec 2025 – Mar 2026

- Built a real-time VR safety training environment for industrial hazard awareness and workforce training.
- Developed interactive training scenarios, UI systems, and immersive simulation workflows in Unreal Engine 5.

Research Assistant — IIT Bombay, India Feb 2025 – Nov 2025

- Developed immersive VR research environments and simulation applications using Unreal Engine 5.
- Collaborated with researchers and multidisciplinary teams to prototype XR-based solutions and evaluate user interaction workflows.
- Designed interactive Blueprint systems, immersive interfaces, and simulation scenarios.
- Conducted testing and optimization, reducing frame-time overhead by approximately 30%.

Research Intern — University of Tennessee, USA Feb 2024 – Jun 2024

- Contributed to the ASTERS research project focused on emergency response simulation and evacuation planning.
- Developed immersive virtual environments and behavioral simulation systems using Unreal Engine.
- Implemented Python and OpenCV workflows for automated event detection and simulation analytics.
- Collaborated with faculty and researchers on simulation design, testing, and evaluation.

Education

B.Tech. Mechanical Engineering (Digital Manufacturing)

Shanmugha Arts, Science, Technology & Research Academy (SASTRA University), India

CGPA: 7.67/10

2020 – 2024

Research Interests

Virtual Reality (VR) • Digital Twins • Human-Computer Interaction • Simulation-Based Learning • AI-Assisted Immersive Experiences • Educational Technologies • User Experience Research • Emerging Interactive Technologies
